

ColdMatch Group — Press Kit

Industrial refrigeration and cold-chain procurement platform of Global B2B Group. Company overview, boilerplate, spokesperson bios and press contacts. Updated September 2026.

Company overview

ColdMatch Group is the industrial refrigeration and cold-chain procurement platform of Global B2B Group, helping commercial and industrial projects identify, compare and connect with qualified refrigeration technology and equipment suppliers. The platform covers cold storage warehouses, cold rooms, blast freezing, CO₂ and ammonia systems, pharma and GDP cold chain, seafood, meat, dairy and horticulture facilities, and cold-warehouse automation.

ColdMatch is not an automatic marketplace. Every project request is reviewed manually by David and the ColdMatch procurement desk before any supplier introduction is made. Buyers receive a structured project brief, cost and energy modelling for their market, and a shortlist of suppliers selected for that specific scope.

Facts at a glance

Platform focus	Industrial refrigeration & cold-chain procurement
Parent company	Global B2B Group
Sister platforms	FeedMatch, FishMatch, PoultryMatch / HatchMatch, SeedMatch
Qualified suppliers	100+ manufacturers, EPCs, integrators and engineering firms
Project threshold	Commercial and industrial projects from USD \$250K+
Core markets	25 country programmes across Africa, MENA, Asia, Europe and the Americas
Languages	English, Arabic, French, Spanish, Portuguese and 10 more
Website	coldmatchgroup.com

What ColdMatch does

- Structured RFQ briefs for cold storage, cold rooms, blast freezing and pharma cold chain.
- Country-specific CAPEX and OPEX modelling using local tariffs, design ambient conditions and grid reliability.
- Manual supplier review and introductions after internal qualification — never automated matching.
- Authority guides, market pages and calculators for 25 markets in 15+ languages.
- Introductions to independent financing partners for qualified projects. ColdMatch and Global B2B Group do not lend and do not give financial advice.

Boilerplate (for publication)

“ColdMatch Group is the industrial refrigeration and cold-chain procurement platform of Global B2B Group, helping commercial and industrial projects identify, compare and connect with qualified refrigeration technology and equipment suppliers.”

Spokespeople and team

David — Managing Director, Cold-Chain Procurement

Reviews every incoming project request personally, qualifies scope, capacity, temperatures, budget and timeline, and decides which suppliers are introduced. Available for interviews on procurement practice, supplier qualification and cold-chain project risk.

Engineering review desk — Refrigeration systems and design review

Reviews cooling loads, CO₂ and ammonia system selection, blast freezing capacity and pharma GDP requirements before a brief is issued to suppliers.

Market intelligence desk — Country cost and energy modelling

Maintains the tariff, design-ambient and grid-reliability data behind the country CAPEX and OPEX calculators across 51 markets.

Buyer support desk — Multilingual buyer guidance

Supports buyers in English, Arabic, French, Spanish and Portuguese from first enquiry through supplier shortlisting.
